11.50 – 12.00 Closing remarks

About Travel Klinix

Unique in its ethos of prevention and early detection, Travel Klinix's core service is travel health and health education. Our HIV screening and health education programme was a finalist at the RCP's Excellence in Patient Care awards 2017.

Dr Ravi Gowda

Travel Klinix founder Dr Gowda is a consultant in infectious diseases, with extensive experience in tropical and travel medicine. He has presented at international and national conferences and leads a variety of health education programmes.

Dr Dan Burns

Army infectious disease registrar Dr Burns has treated infections in both civilian and military travellers. He has practiced medicine in Sierra Leone and Afghanistan. Dr Burns is currently researching novel ways of preventing travellers' diarrhoea.

Dr Osama Ahmed

A graduate of Khartoum University, Dr Ahmed was part of a leishmaniasis research group which changed local guidelines in Sudan. He also worked in Oman before moving to the UK in 2015. Dr Ahmed is currently an ST3 in infectious diseases and virology in Leicester.
